

# Explore Your Future in ETCS!

This summer, you can grab an amazing opportunity to learn from Purdue Fort Wayne professors in engineering, technology, and computer science.

Discover PFW inside engineering and computer labs when you experience a variety of projects. Each day, your camp will rotate through two sessions to meet your instructors, engage in hand-on activities, and watch enlightening demonstrations.

Hear from experts about subjects like computer engineering; electrical, civil, and mechanical engineering; computers and coding; and more. You can explore topics that interest you and get answers to questions about how they relate to your world and your future career.

Choose to be a part of this new PFW Exploration Camp!

Choose between: **\*WEEK I** **OR** **\*WEEK 2**  
**July 12-16** **July 19-23**
